

## Sustainable Schools

### GOING GREEN WITH PBS: MANCH SCHOOL, LAS VEGAS

The nation's largest green school district chose PBS SIPs for their newest project. The city of Las Vegas, Nevada successfully framed the Manch School with PBS SIPs in record time. Choosing SIPs for the new school's framing system makes for a responsible green structure that carries a warranty, and is better for staff and student health for many years to come.

- **LEED Points:** Up to 23 valuable environmental design points through the standard in green certification
- **Efficient:** Reduce heating & cooling costs by 60%
- **Healthy:** Better indoor air quality—less absences
- **Comfortable:** Warmer in winter, cooler in summer
- **Easy to Operate:** Tight building envelope reduces HVAC mechanical equipment sizes and costs
- **Environmentally Responsive:** SIPs produce 30% less jobsite waste than traditional construction, reduce operating costs by hundreds of thousands of dollars over a school's life cycle and conserve natural resources

# Sustainable Schools

## PBS SIPS ADVANTAGES

- **Stronger:** Exceptional proven product strength, much stronger than traditional framing methods. No need for a truss system.
- **Straighter:** Predictable engineered straight product. Why settle for the imperfections of dimensional lumber?
- **Greener:** LEED Points, Environmental Tax Credits, IAQ & More!
- **Warranty:** Peace of mind with a sound warranty. Huge advantage as traditional framing methods offer no warranty.
- **Fast Close In:** Schools are framed in days, not weeks.
- **Top Code Reports:** The industry's best building code reports.
- **Stable R-Value:** No thermal drift, unlike other SIPs insulation, the R-Value of PBS' EPS insulating core will remain stable over the entire product service life.
- **Proven Performance:** PBS SIPs have been used in the field for over 25 years, so actual product performance is well known.
